REVIEW OF PERMIT, PERFORMANCE STANDARDS PERMIT CONDITION REQUIREMENTS

- Substantiate the elements on this inspection by checking the appropriate performance standard.
 a. For COMPLETE inspections provide narrative justification for any elements not fully inspected unless element is not appropriate to the site, in which case check Not Applicable.
- b. For PARTIAL inspections check only the elements evaluated.

 2. Document any noncompliance situation by reference the NOV issued at the appropriate performance standard listed below.
- 3. Reference any narratives written in conjunction with this inspection at the appropriate performace standard listed below.
- 4. Provide a brief status report for all pending enforcement actions, permit conditions, Divison Orders, and amendments.

Page 3 of 3

2. Signs and Markers

The identification sign is next to the road to the site. The permittee has removed the subsidence markers from the permit area.

3. Topsoil

All topsoil was used for reclamation.

4.a Hydrologic Balance: Diversions

The diversions were stable and open. Some grasses are growing within the diversion.

4.c Hydrologic Balance: Other Sediment Control Measures

The complete site is pocked to prevent sediment from leaving the reclaimed area.

4.d Hydrologic Balance: Water Monitoring

No water monitoring is taken. The permittee received approval from DOGM.

8. Noncoal Waste

The site is clear of non-coal waste materials.

10. Slides and Other Damage

No slides were noticed during the inspection.

12. Backfilling And Grading

The site is completely backfilled and graded to AOC.

13. Revegetation

Small pine tress are coming up on the upper bench area. The pine trees are native to the area.

18. Support Facilities, Utility Installations

There are no facilities at Starpoint.

Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:

No violatios were issued.

The Permittee notified the Division that the required first quarter of 2011 surface water monitoring information for the Castle Gate Mine was in the DOGM EDI pipeline and was acceptable for uploading. The Permittee continues to meet the Special Condition included as Attachment "A" of the current State permit. There are no other "special" permit

The field conditions in Sowbelly and Hardscrabble Canyons remain virtually unchanged, as does the condition of the reclaimed area for Adit #1.

Page 3 of 3

1. Permits, Change, Transfer, Renewal, Sale

Castle Gate is in the Phase II stage of reclamation. There are two sub-stations and a small area (Adit #1) that are in Phase I.

2. Signs and Markers

Identification signs are at the gates to the property.

3. Topsoil

All topsoil was used in reclamation.

4.a Hydrologic Balance: Diversions

All diversions were opened and would function as designed.

4.c Hydrologic Balance: Other Sediment Control Measures

The reclaimed site is pocked for sediment control.

7. Coal Mine Waste, Refuse Piles, Impoundments

Refuse pile was reclaimed and requires no quarterly inspections.

8. Noncoal Waste

The site was clear of non-coal waste materials.

10. Slides and Other Damage

No slides or damage was noticed during the inspection.

12. Backfilling And Grading

The sites are completely reclaimed. All backfilled material was used.

13. Revegetation

Vegetations is coming back after winter. This site in my judgment most areas are highly vegetated.

16.a Roads: Construction, Maintenance, Surfacing

The permittee removed the truck load of coal dumped by someone at the end of the road at #5 Mine.

18. Support Facilities, Utility Installations

There are no facilities at Castle Gate.

2. Signs and Markers

The identification signs is next to the road to the property. The information meets the R645 Coal Rules.

3. Topsoil

All topsoil was used in reclamation.

4.a Hydrologic Balance: Diversions

Diversions were opened and would function as designed.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

Utah State Unversity fixed the sediment pond which was part of the Phase 3 bond release. The sediment pond slope was eroded due to creek over topping during a rain storm.

4.c Hydrologic Balance: Other Sediment Control Measures

The reclaimed area is pocked for sediment control.

7. Coal Mine Waste, Refuse Piles, Impoundments

The refuse pile has been reclaimed and the permittee received approval for no more quarterly inspection.

8. Noncoal Waste

The site is clear of non-coal waste material.

10. Slides and Other Damage

The site is clear of non-coal waste material. There appears to be no signs of subsidence with the shafts.

12. Backfilling And Grading

The total disturbed area is reclaimed and is backfilled and graded.

18. Support Facilities, Utility Installations

There are no facilities.
